# ACKNOWLEDGEMENT

I would like to take this opportunity to express my deep sense of gratitude to all individuals who helped me directly or indirectly during this project work.

Firstly, I would like to thank our supervisor, Ms. Umamaheswari, Ms. Medini, and Mr. Sagar Chetan, for being a great mentor and the best adviser I could have asked for. Their advice, encouragement, and constructive feedback served as a source of innovative ideas and inspiration, and were central to the successful completion of this project. The confidence shown in us was the biggest source of motivation throughout this journey.

I extend my sincere thanks to the Edunet Foundation, Microsoft, LinkedIn, and SAP for providing this fellowship opportunity, the learning resources, and the platform to develop and showcase our AI skills.

I am also grateful to our institution, Marwadi University Rajkot, for providing the necessary infrastructure and support throughout the project duration.

Finally, I thank my family and friends for their continuous encouragement and support.

# ABSTRACT OF THE PROJECT

This project is part of the AICW (Artificial Intelligence in the Contemporary World) Fellowship Program, a collaborative initiative by Edunet Foundation in partnership with Microsoft, LinkedIn, and SAP. The fellowship is designed to equip students with practical, hands-on skills in Artificial Intelligence, Data Analytics, and Business Intelligence tools.

The project focuses on developing an AI-powered legal awareness assistant that helps users understand basic legal rights, government services, and legal procedures through conversational interaction. Many citizens lack awareness of their legal rights and often struggle to access reliable legal information from government portals. This project explores how generative AI tools such as ChatGPT and Google Gemini can be used to simplify legal communication and improve accessibility of legal information.

The system is designed using prompt engineering techniques to generate accurate and structured responses related to legal rights, complaint procedures, and government support services. The chatbot references official legal awareness resources such as the National Legal Services Authority and the National Consumer Helpline.

The project methodology includes designing prompt structures, creating a structured dataset mapping citizens' issues to relevant legal authorities, and testing AI responses for clarity and reliability. The results demonstrate that AI tools can significantly enhance access to legal awareness by providing instant guidance, structured explanations, and simplified legal information. This project highlights the potential of generative AI in improving public access to legal knowledge while emphasizing responsible AI usage and reliance on verified government sources.

CHAPTER 1

# Introduction

This chapter introduces the project undertaken as part of the AICW Fellowship Program. It outlines the background, the problem being addressed, the motivation behind this work, and the objectives and scope of the project. The fellowship projects span multiple domains including Data Analytics, Business Intelligence, Healthcare Analytics, Content Generation, and AI-assisted Reporting.

## 1.1 Problem Statement

Many citizens are unaware of their legal rights and the procedures available to address grievances related to employment, consumer protection, workplace issues, and civil disputes. Accessing legal information from official government portals can be challenging due to complex legal language, lack of digital literacy, and difficulty navigating multiple platforms.

Existing legal awareness systems often require users to manually search government websites or consult legal professionals, which may be time-consuming or inaccessible for many individuals.

This project addresses the challenge of improving legal awareness by using generative AI to provide simplified, conversational explanations of legal rights and procedures.

The system aims to help users understand which legal authority or government body is responsible for addressing their issue.

## 1.2 Motivation

The motivation behind this project comes from the increasing importance of digital tools in improving access to public services and legal awareness.

Many individuals, especially students, job seekers, and workers, may face situations where they need basic legal guidance but do not know where to begin. Generative AI technologies now offer an opportunity to simplify complex information and provide user-friendly explanations.

Through this project, AI tools such as ChatGPT and Google Gemini are explored as potential assistants for improving public understanding of legal rights and complaint mechanisms.

This project aligns with modern industry trends in AI-assisted communication, digital governance, and intelligent information systems.

## 1.3 Objectives

The primary objectives of this project are:

- To study how generative AI can assist in legal awareness and communication.
- To design structured prompts that guide AI tools to generate reliable legal explanations.

- To create a logical dataset mapping citizens' issues to the relevant legal authorities or institutions.
- To test AI tools in generating simplified legal guidance based on official resources.
- To evaluate how AI can improve accessibility of legal information for non-experts.
- To develop a framework for responsible use of AI in legal information assistance.

## 1.4 Scope of the Project

This project focuses on using generative AI tools to assist users in understanding basic legal rights and available complaint mechanisms.

The system references publicly available information from government legal awareness portals such as:

- National Legal Services Authority
- Department of Justice
- National Consumer Helpline

The tools used in the project include:

- ChatGPT
- Google Gemini

The project is limited to generating legal awareness information and does not provide professional legal advice or real-time case management. The project is intended as a fellowship showcase and is not a production-level system.

CHAPTER 2

# Literature Survey

A literature survey reviews existing research, tools, and methodologies relevant to the project domain. It helps identify gaps that the current project aims to address.

## 2.1 Existing Work and Research

Several digital initiatives have been introduced to improve public access to legal information. Government organizations such as the National Legal Services Authority provide legal awareness programs and free legal aid services.

Additionally, government portals such as India Code provide access to official legislation and legal documents.

Recent research in artificial intelligence has explored the use of conversational AI systems to simplify complex information and improve accessibility. Generative AI tools such as ChatGPT have demonstrated the ability to generate structured explanations, summarize legal documents, and assist with information retrieval.

However, there is still limited exploration of how prompt engineering techniques can be used to design AI systems specifically for legal awareness and public legal education.

## 2.2 Tools and Technologies Review

The following technologies are used in this project:

- Microsoft Excel — widely used for data cleaning, transformation, and basic visualization. Pivot tables, conditional formatting, and data validation are commonly used techniques.
- AI Chatbots (e.g., ChatGPT, Gemini) — generative AI tools used for content creation, marketing copy, report generation, and prompt-driven analysis.
- **ChatGPT** – A generative AI chatbot developed by OpenAI that can generate human-like responses using natural language prompts.
- **Google Gemini** – A generative AI system developed by Google that provides conversational AI capabilities and information summarization.
- **Government Legal Portals** – Official platforms that provide verified legal information including: National Legal Services Authority, National Consumer Helpline, and India Code.

## 2.3 Gaps Identified

Although several legal awareness platforms exist, they often present information in complex legal language that may be difficult for non-experts to understand.

Additionally:

• Existing systems rely heavily on manual search rather than conversational assistance.
• There is limited integration of generative AI tools with legal awareness platforms.
• Prompt engineering techniques for generating structured legal explanations are still evolving.

This project attempts to address these gaps by designing AI prompts and datasets specifically for legal awareness assistance.

CHAPTER 3

# Proposed Methodology

This chapter describes the methodology adopted to achieve the project objectives. It covers the system design, modules used, data flow, advantages, and requirement specifications.

## 3.1 System Design

The system design involves using generative AI tools to provide simplified legal information through structured prompts.

The process includes the following stages:

Input – User queries about legal rights or complaint procedures.
Processing – AI interprets the query using prompt engineering techniques.
Reference – The AI references legal awareness information from official sources.
Output – The system generates simplified explanations and guidance.

## 3.2 Modules / Components Used

- Module 1 – Dataset Preparation
  Mapping real-world issues to appropriate legal authorities.
- Module 2 – Prompt Engineering
  Designing prompts to generate accurate legal responses.
- Module 3 – AI Response Generation
  Using ChatGPT and Google Gemini to generate responses.
- Module 4 – Validation and Testing
  Checking AI responses for clarity and logical accuracy.

## 3.3 Data Flow Diagram (DFD)

A Data Flow Diagram (DFD) is a graphical representation of how data flows through your system. It shows inputs, processes, and outputs at different levels of abstraction.

### DFD Level 0 — Context Diagram

Shows the system as a single process with its inputs and outputs.

```
+-----------+
|   USER    |
| (Citizen/Student) |

***Figure 2: Level 1 Data Flow Diagram of AI Legal Assistant System***

## 3.4 Advantages

The key advantages of my proposed approach:

- Provides simplified explanations of legal rights.
- Improves accessibility of legal information.
- Reduces time required to search multiple government portals.
- Demonstrates practical use of generative AI for public awareness.
- Encourages responsible and ethical AI usage.

## 3.5 Requirement Specification

### Hardware Requirements

| Component | Specification |
|---|---|
| Processor | Intel Core i3 or higher (i5/i7 recommended) |
| RAM | Minimum 4 GB (8 GB recommended) |

| | |
|---|---|
| Storage | Minimum 50 GB free disk space |
| Display | 1366 x 768 resolution or higher |
| Internet | Required for Chatbot access |

### Software Requirements

| Software | Details |
|---|---|
| Operating System | Windows 10 |
| Microsoft Excel | Microsoft 365 (Excel with Copilot) / Excel 2019+ |
| AI Chatbot | ChatGPT / Google Gemini / Microsoft Copilot (web) |
| Web Browser | Google Chrome / Microsoft Edge (latest version) |

CHAPTER 4

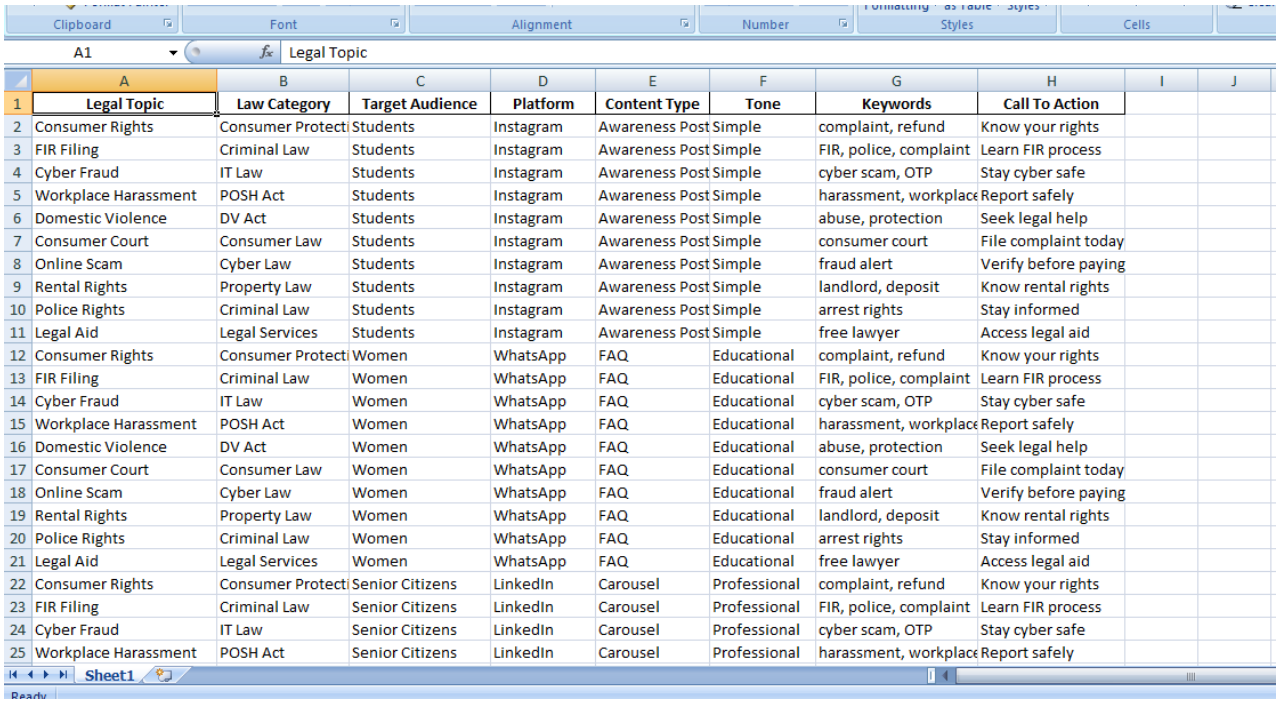
# Implementation and Results

This chapter presents the actual implementation of the project and the results obtained at each stage. Screenshots of dashboards, cleaned datasets, or generated content should be inserted where indicated.

## 4.1 Data Cleaning Results

Describe the data cleaning process and present the before/after comparison of your dataset.

- Dataset source: Manually created
- Original dataset size: 81 rows and 8 columns in the raw data.
- Issues found: Duplicates, Unrealistic pairings, Little content
- Cleaning steps applied: Removal of duplicates. An increased structured dataset was created mapping common real-world situations to the appropriate legal authority. Unrealistic pairings were corrected and logical relationships were established.
- Cleaned dataset size: 800 Rows and 17 Columns after cleaning and logical mapping.



| Legal Topic | Law Category | Target Audience | Platform | Content Type | Tone | Keywords | Call To Action |
|---|---|---|---|---|---|---|---|
| Consumer Rights | Consumer Protecti | Students | Instagram | Awareness Post | Simple | complaint, refund | Know your rights |

## 4.2 Visualization / Output Results

The AI system successfully generated simplified explanations for several legal queries including:

- Consumer complaint procedures
- Workplace grievance guidance
- Basic legal rights awareness

The results demonstrated that AI can effectively simplify complex legal information.

| S/N | Issues | Authority |
|---|---|---|
| 1 | Consumer Complaint | National Consumer Helpline |
| 2 | Legal Aid Request | National Legal Services Authority |

***Table 1: Dataset Mapping Citizen Issues to Legal Authorities.***

| Issue Faced by Citizen | Relevant Authority | Purpose |
|---|---|---|
| Consumer product defect | National Consumer Helpline | File consumer complaint |
| Need free legal assistance | National Legal Services Authority | Access free legal aid |
| Checking court case status | eCourts Portal | Track case progress |
| Domestic violence complaint | Women & Child Development Ministry | Protection support |
| Workplace harassment | Internal Complaints Committee / Labour Dept | Workplace grievance |
| Online fraud complaint | Cyber Crime Portal | Cybercrime reporting |
| Salary not paid | Labour Commissioner | Wage dispute resolution |
| Legal information about laws | India Code | Access official legislation |
| Child rights violation | Childline Services | Child protection |
| Land or property dispute guidance | Local Civil Court / Legal Aid | Legal dispute resolution |

***Figure 6: Dataset Mapping Citizen Issues to Legal Authorities***

**User → Prompt → AI Model → Legal Data → Simplified Output**

***Figure 7: AI Legal Assistant Workflow***

## 4.3 AI Tool Integration Results

1. **Tool used**:
   The project used multiple generative AI tools to support legal awareness content generation and analysis:

   - ChatGPT for prompt engineering, dataset generation, and simplified legal explanations.
   - Google Gemini for cross-checking responses and comparing AI outputs.
   - Additional AI-assisted tools were used for structuring the dataset and generating content automation prompts.

These AI systems helped transform complex legal information into simple explanations suitable for public awareness.

2. **Prompts used**: Below are examples of prompts used during the project:

    - **Prompt 1**: Explain the steps for filing a consumer complaint in India in simple language. Mention the authority responsible and list the steps citizens should follow.
    - **Prompt 2**: A worker has not received their salary for two months. Explain the employee's rights and which authority they should approach. Provide the answer in simple and educational language.
    - **Prompt 3**: Simplify the legal rights of tenants in India and explain what action they can take if the landlord illegally evicts them.

    These prompts were designed using **prompt engineering techniques** to ensure the AI generated structured, educational, and legally aware responses.

3. **Output quality**:

    The AI-generated responses were generally clear, structured, and easy to understand. The outputs included:

    - simplified explanations of legal rights
    - identification of relevant government authorities
    - step-by-step guidance for filing complaints or seeking legal assistance

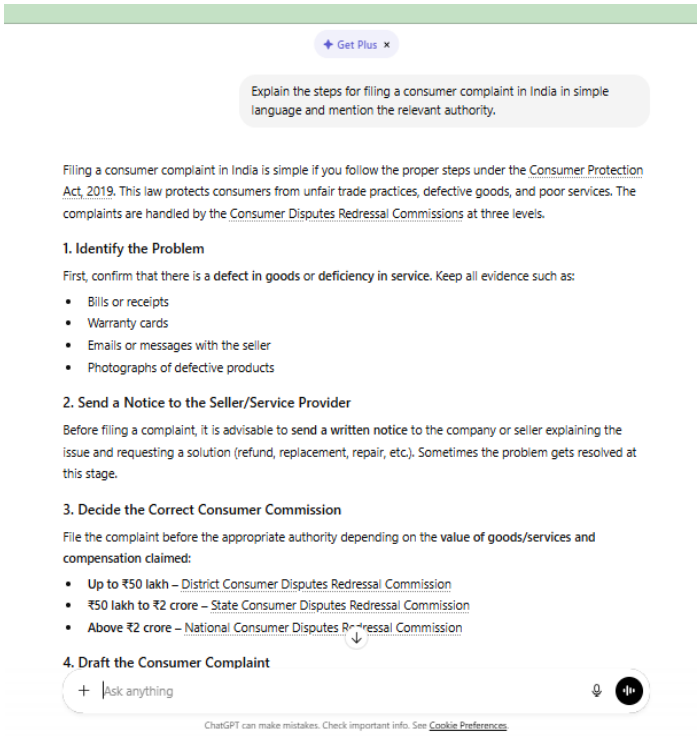
    However, the responses were always reviewed to ensure they aligned with publicly available legal information from government portals such as: National Legal Services Authority, and National Consumer Helpline.

    Overall, the AI outputs were highly useful for generating **educational legal awareness content**.

4. **How it enhanced the project**: The integration of AI tools significantly improved the efficiency and quality of the project. AI helped the project by:

    - generating large datasets for legal awareness scenarios
    - simplifying complex legal language into citizen-friendly explanations
    - speeding up content generation for legal awareness posts
    - enabling rapid experimentation with different prompt structures
    - supporting the design of a conversational legal awareness chatbot concept

    Using AI reduced the time required for drafting explanations and allowed the project to focus on **prompt design, dataset structure, and user accessibility**.



Get Plus ×

Explain the steps for filing a consumer complaint in India in simple language and mention the relevant authority.

Filing a consumer complaint in India is simple if you follow the proper steps under the Consumer Protection Act, 2019. This law protects consumers from unfair trade practices, defective goods, and poor services. The complaints are handled by the Consumer Disputes Redressal Commissions at three levels.

**1. Identify the Problem**

First, confirm that there is a **defect in goods** or **deficiency in service**. Keep all evidence such as:

- Bills or receipts
- Warranty cards
- Emails or messages with the seller
- Photographs of defective products

**2. Send a Notice to the Seller/Service Provider**

Before filing a complaint, it is advisable to **send a written notice** to the company or seller explaining the issue and requesting a solution (refund, replacement, repair, etc.). Sometimes the problem gets resolved at this stage.

**3. Decide the Correct Consumer Commission**

File the complaint before the appropriate authority depending on the **value of goods/services and compensation claimed:**

- **Up to ₹50 lakh** – District Consumer Disputes Redressal Commission
- **₹50 lakh to ₹2 crore** – State Consumer Disputes Redressal Commission
- **Above ₹2 crore** – National Consumer Disputes Redressal Commission

**4. Draft the Consumer Complaint**

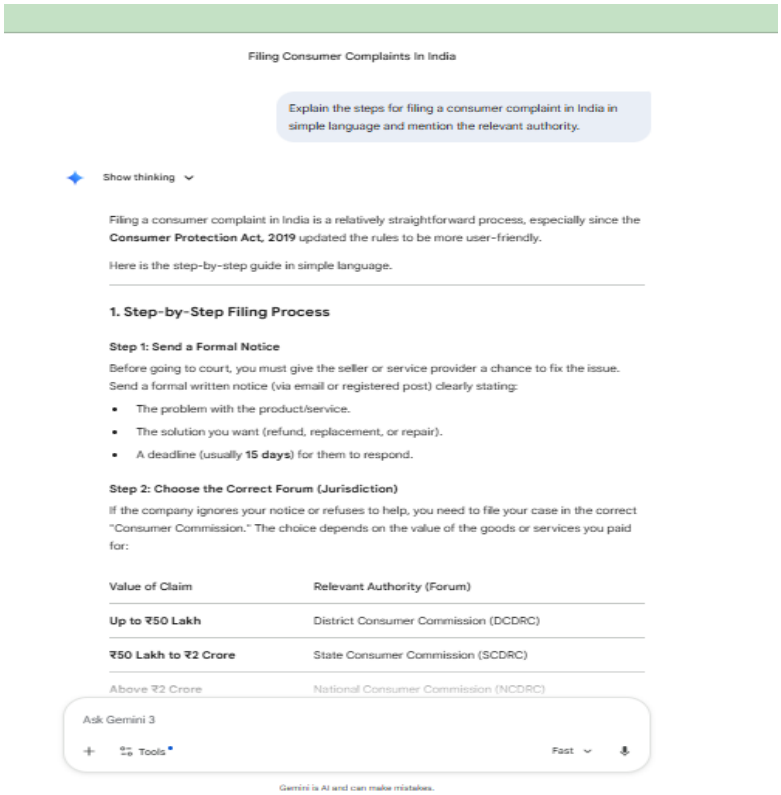
***Figure 8: Legal Awareness Response Generated Using ChatGPT***



Filing Consumer Complaints In India

Explain the steps for filing a consumer complaint in India in simple language and mention the relevant authority.

Show thinking

Filing a consumer complaint in India is a relatively straightforward process, especially since the **Consumer Protection Act, 2019** updated the rules to be more user-friendly.

Here is the step-by-step guide in simple language.

**1. Step-by-Step Filing Process**

**Step 1: Send a Formal Notice**

Before going to court, you must give the seller or service provider a chance to fix the issue. Send a formal written notice (via email or registered post) clearly stating:

- The problem with the product/service.
- The solution you want (refund, replacement, or repair).
- A deadline (usually **15 days**) for them to respond.

**Step 2: Choose the Correct Forum (Jurisdiction)**

If the company ignores your notice or refuses to help, you need to file your case in the correct "Consumer Commission." The choice depends on the value of the goods or services you paid for:

| Value of Claim | Relevant Authority (Forum) |
|---|---|
| **Up to ₹50 Lakh** | District Consumer Commission (DCDRC) |
| **₹50 Lakh to ₹2 Crore** | State Consumer Commission (SCDRC) |
| Above ₹2 Crore | National Consumer Commission (NCDRC) |

CHAPTER 5

# Discussion and Conclusion

## 5.1 Key Findings

The project generated several important insights regarding the use of generative AI for legal awareness.

- **Key Finding 1**: A structured dataset of more than **800 legally relevant records** was successfully created, mapping citizen issues to appropriate legal authorities and content formats.
- **Key Finding 2**: Prompt engineering significantly improved the clarity and reliability of AI-generated responses, allowing complex legal topics to be explained in simple language.
- **Key Finding 3**: AI tools were able to generate educational legal content much faster than manual drafting, reducing the time required to create awareness materials.
- **Key Finding 4**: Logical dataset mapping (citizen issue → authority → explanation → content type) improved the relevance of responses and prevented unrealistic pairings.
- **Key Finding 5**: Generative AI systems demonstrated strong potential for supporting legal awareness initiatives, especially for citizens who lack access to legal education.

## 5.2 Project Links

- Power BI / Dashboard Link (if applicable):

## 5.3 Limitations

Despite the success of the project, several limitations were identified.

- **Limitation 1**: The AI system relies on prompt instructions and does not have direct access to official legal databases, which may limit the depth of legal detail provided.
- **Limitation 2**: AI-generated responses may occasionally produce generalized explanations and must be verified against official legal sources.
- **Limitation 3**: The project focused more on legal awareness using AI Chatbots.
- **Limitation 4**: The dataset used in the project is limited to selected legal topics and may require expansion to cover additional areas of law.

## 5.4 Future Work

Several improvements can be made to extend this project in the future.

- Develop a fully functional legal awareness chatbot interface for citizens.

- Integrate official legal databases such as India Code or legal aid portals through APIs.
- Expand the dataset to include additional legal domains such as labour law, cyber law, and property disputes.
- Implement multilingual support to assist citizens who do not speak English.
- Develop a structured prompt library for legal awareness use cases.
- Integrate voice-based AI assistants for easier accessibility.

## 5.5 Conclusion

This project explored the application of generative AI and prompt engineering to improve public access to legal awareness information.

By creating a structured dataset and designing effective prompts, the project demonstrated how AI tools such as ChatGPT and Google Gemini can generate simplified explanations of legal rights and procedures. The system helps bridge the gap between complex legal language and citizen understanding.

Although the project does not replace professional legal advice, it shows how AI can serve as an educational assistant guiding citizens toward the appropriate authorities and legal resources.

All project objectives were successfully achieved, including dataset creation, prompt engineering experimentation, and AI-assisted legal content generation. The fellowship experience significantly improved practical skills in AI tools, prompt design, legal communication, and digital content automation.

# APPENDICES

Includes additional information that supports the project. This may include:

## Appendix A — AI Prompts Used

**Legal Chatbot Prompt Examples**

1. Explain the steps for filing a consumer complaint in India in simple language and mention the relevant authority.
2. Role: Legal Awareness Assistant
   Task: Explain legal rights in simple language
   Constraints: Do not give legal advice
   Source: Government legal portals
3. Role: Legal Awareness Assistant
   Task: Explain the procedure for filing a consumer complaint in India.
   Instructions:
   - Use simple language
   - Mention the relevant government authority
   - Provide step-by-step guidance
   - Do not provide legal advice
   Source Preference: Government legal portals.
4. Role: AI Legal Awareness Guide
   User Query: What should a worker do if salary is not paid?
   Output Format:
   1. Rights of the employee
   2. Responsible authority
   3. Steps to file complaint
   4. Important notes

## Appendix B — Screenshot Gallery

**Legal Chatbot Prompt Templates**

1. Legal Awareness Post Template: Act as a legal awareness assistant. Explain {Legal Topic} under {Law Category} for {Target Audience}. Write for {Platform}. Content type: {Content Type}. Tone: {Tone}. Include keywords: {Keywords}. End with CTA: {Call To Action}.
2. FAQ Response Template: Act as a legal Chatbot. Answer a user question about {Legal Topic} under {Law Category}. Audience: {Target Audience}. Keep tone {Tone}. Keep answer legally accurate and simple.
3. Campaign Content Template: Create legal awareness campaign content about {Legal Topic}. Target audience: {Target Audience}. Platform: {Platform}. Tone: {Tone}. Include practical example and CTA: {Call To Action}.
4. Myth vs. Fact Template: Create a myth vs. fact content piece about {Legal Topic} under {Law Category}. Audience: {Target Audience}. Tone: {Tone}. Make it easy to understand.
5. Chatbot Instant Reply Template: Generate a short chatbot reply explaining {Legal Topic}. Audience: {Target Audience}. Tone: {Tone}. Include legal clarity and one helpful next step.
